

Section 125 POP Kit

Premium Only Plan (POP) - Is one of the simplest benefits an employer can offer, and it delivers real savings to employees and their company. By allowing employees to pay their portion of premium costs BEFORE taxes, employees typically save 25% or more and the employer benefits from nearly 8% in FICA savings. However, to deduct employee premium costs pre-tax, you MUST have a plan document.

By taking advantage of Section 125 of the Internal Revenue Code, employers can save money for their employees and themselves. The Section 125 kit is available to all HealthPass groups, to obtain your kit today visit <https://form.jotform.com/203143849897166>

The kit includes everything you need to start and maintain your plan:

- Answers to frequently asked questions
- An implementation checklist
- Election waiver form
- Customized plan document
- Signature - ready board resolution
- Employee Summary
- Compliance Guidelines

Employer Benefits and Examples of Savings - Employers can save money on their annual payroll taxes of social security, FUTA and SUTA. By allowing employees to contribute to their health coverage on a pre-tax basis, employers no longer pay these payroll taxes on the pre-tax contribution to the health insurance premium.

Employee Benefits and Example of Savings - Employees also get to participate in the savings when a Section 125 Plan is put into place. By using pre-tax dollars to pay for their coverage, employees reduce their taxable income, thus limiting the amount of withholding.
